

Job Post: Journeyman Electrician

Overview:

Looking for a fun, reliable, honest, hardworking Electrician who would enjoy working for a small, yet growing, company! We thrive on clear communication, quality craftsmanship, and healthy working relationships! We believe in helping our employees grow to their full potential, so the sky's the limit!

Function as a Electrician/Journeyman Wireman for Accel Electric LLC.; installing new electrical systems and repairing existing electrical systems while maintaining compliance with national, state and local electrical codes along with all Accel Electric LLC. policies and procedures. Support activities at commercial, industrial, institutional and residential locations.

Essential Duties and Responsibilities:

- Install, repair, maintain, and test commercial, industrial and residential electrical systems in full support of Accel Electric's safety, operations and productivity initiatives.
- Use industry related hand tools and power tools.
- Measure, cut, bend, thread, etc. and install wire and electrical cable systems, conduit systems and other wire raceway systems.
- Feed to, pull into, and terminate wire and cable within control centers,
- distribution boxes, transformers, transducers, switchgear, receptacles, switches, etc.
- Splice and terminate wires at junction points.
- Troubleshoot equipment electrical systems and control circuits and build control panels from drawings.
- Prepare sketches and schematic diagrams showing the location of wiring and electrical systems.
- Delegate tasks and assist with training other employees.
- Communicate effectively with Foremen and crew members.

- Maintain workflow schedule to ensure all Accel Electric productivity objectives are met.
- Demonstrate the highest level of professionalism and courtesy when interacting with colleagues, customers and vendors.
- Adhere to all Accel Electric's safety policies and procedures.

Skills and Experience:

- Must hold a current Journeyman Wireman license (if required by the applicable state, city or county).
- Ability to install power systems: lighting, fire protection, security, and data network.
- Ability to build and install control panels and provide maintenance to systems.
- Experience using Electrical Single Line blueprints.
- Experience finding and repairing faults in electrical apparatus and circuits.
- Ability to verify compliance and functionality of installations.
- Experience helping with the management of a project and crew.
- Ability to manage material estimates.
- Demonstrate strong leadership and pre-planning abilities.

Physical Demands and Work Environment:

The employee may require the ability to do the following:

- Lift 50 lbs from the ground and pull 50 lbs of force.
- Perform ladder climbing, wire pulling and conduit pulling.
- Fully squat, stoop or kneel while wearing a 25 lb tool belt.
- Maintain a standing position for long periods of time while performing repetitive actions such as grasping or manipulating wires.
- Work off of ladders, man lifts or reach booms

Benefits:

The anticipated starting base pay for this position is: \$35-45/hr

This position is eligible for the following benefits: Annual Incentive Program, Medical/Pharmacy Plan, Dental, Paid time off (PTO), Holidays, Volunteer Paid Time Off (VPTO), Parental Leave.

Benefit plans are subject to change and Accel Electric has the right to end, suspend, or amend any of its plans, at any time, in whole or in part.

The above job description is meant to describe the general nature and level of work to be performed; it is not intended to be an exhaustive list of all responsibilities, duties and skills required for the position. Employment is contingent upon the individual maintaining a current Journeyman Wireman License (if required by the applicable state, city or county).

Accel Electric LLC. is an equal opportunity employer that sees diversity as a positive force in a drug-free workplace. We encourage minorities, women, veterans and disabled individuals to apply.
